## **POSITION DESCRIPTION**

- TITLE:** Electrical Maintenance Technician
- COMPANY:** Company is involved with the design, sale, installation and support of packaging equipment, mainly in the cosmetic and pharmaceutical industries.
- OFFICE LOCATION:** Blacksburg, Virginia
- OVERVIEW:** Self-motivated individual required to perform the care and use of standard hand tools, conduit benders, forklifts, grinders, and electrical test equipment to do electrical construction
- The importance to keep a safe work environment and to work in a safe manner that does not endanger themselves or anyone else around them and to be able to identify any work hazards is the responsibility of the employee
- Must have or be working toward a Virginia State Electrical license
- Travel to our customer's facility for startup assistance and training when necessary
- REQUIRED SKILLS:** Experience with 24VDC controls and troubleshooting high voltage systems up to 480VAC, 3-Phase, 60Hz required
- Experience with Allen Bradley PLCs, servo drives, and variable frequency drives helpful but not necessary
- Take a pre-engineered panel schematic and wire all components while making sure that they are identified and routed in a professional and safe manner as not to endanger others working in the facility in a timely manner
- Interpret blueprint with little or no engineering instruction to determine the proper wire sizing, conduit size, and routing
- Must also have mechanical aptitude in order to help with pneumatic and mechanical machine assembly

**EDUCATION AND EXPERIENCE:**

Minimum of a high school diploma required

**COMPENSATION AND BENEFITS:**

Base compensation will be competitive and reviewed annually. This will be based on successful performance and achievement of company objectives.

Health insurance and major medical is offered. Company contributions for savings and investment plan

Generous holiday and vacation schedule.
